Insight Software ships ElectroFile for the NeXT computer.

For a free demo version of ElectroFile, contact Insight Software directly. There is also a demo version of ElectroFile and sample library on the following three archive sites: [sonata.cc.purdue.edu](http://sonata.cc.purdue.edu), [nova.cc.purdue.edu](http://nova.cc.purdue.edu), and [cs.orst.edu](http://cs.orst.edu).

Insight Software is now shipping ElectroFile, a powerful yet easy-to-use electronic filing system for the NeXT computer. ElectroFile takes full advantage of NeXT's imaging capabilities and allows users to file and locate any kind of document with unprecedented speed.

Originally developed for the complex filing needs of litigation support, ElectroFile's ability to process all types of files—EPS, TIFF, RTF, faxes, spreadsheets, etc.—makes it the ideal electronic filing system for anybody using a NeXT computer. Even simple everyday tasks become easier, such as locating a specific fax or office memorandum which was received several weeks ago.

ElectroFile's approach to document retrieval is extraordinarily powerful. The retrieval engine is based upon B\*Tree indexes and generates fast searches, regardless of the number of documents in the library. The user may build arbitrarily complex search paradigms by combining text and field searches, coupled with date restriction options.

Classification is easy with user-configurable indexing and automated data entry. Files are loaded into ElectroFile either by the "drag and drop" method or by scanning images directly into ElectroFile's own "Front Desk." ElectroFile allows the user to attach files, add notes, edit, OCR, or record voice messages either on the classification interface or in a notes section automatically placed below each page of the original document.

#### Availability

ElectroFile is currently shipping and available. For price information contact NeXTConnection at (800) 800-NeXT or +1 603.446.7771. Academic discounts are available to qualified individuals and institutions. Companies interested in the upcoming networkable version of ElectroFile should contact Insight Software directly at +1 503.222.2425.
