

Dots

Generic printer driver application for NEXTSTEP™

Dots is a generic printer driver which allows you to connect different printers to your NEXTSTEP computers. Dots supports ink-jet printers, non-PostScript laser printers, Canon CLC color laser copiers and dye diffusion thermal transfer printers like the Seiko PhotoMaker and Shinko CHC-S445. Printers that are connected with Dots are available throughout the network.

Versions of Dots

- Dots Mono supports HP monochrome printers through the serial port:
 - HP LaserJet II, III, IV and compatible.
 - HP DeskJet 500/510 and compatible.
- Dots Color supports the Hewlett Packard Deskjet 500C and 550C through the serial port.
- Dots PCL5 Color supports the HP DeskJet 1200C and HP PaintJet XL/XL 300 through the serial port.
- Dots RTL Color supports the HP DesignJet 600/650 through the serial port.
- Dots TS supports the Seiko PhotoMaker through the SCSI port.
- Dots CLC10 and Dots CLC500 allows you to connect the line of Canon Color Laser Copiers CJ10, CLC300 and CLC 500 to your computer. These brilliant color printers are also usable as a scanner or copier. For that reason the Canon CLC is an ideal peripheral for a NEXTSTEP computers.

Requires NEXTSTEP Release 3.1 or higher. Now shipping in Multi-Architecture Binary (MAB) format. PostScript license must be purchased directly from Adobe Systems.
