eXTRAPRINT

Desktop Color Comps

GS Corporation's eXTRAPRINT is the perfect companion software for Canon's CJ10 Color Copier, Color Laser Copiers – 350/550 series and color bubblejet A1 copier. Make stunning color comps from any NEXTSTEP application that prints. eXTRAPRINT lets you select the media (paper or transparency), set output resolutions from 72 to 400 dpi, and adjust the color balance. No matter what your job, eXTRAPRINT produces optimal results.

eXTRAPRINT integrates seamlessly with NEXTSTEP and allows for easy printing over a network. With NEXTSTEP's Display PostScript Level 2, output is remarkably fast. Simply connect your Canon Color Copier directly to your computer's SCSI port, choose "Print," and in a matter of minutes, you'll have sharp, full-color reproductions of even the most complex artwork.

Combine eXTRAPRINT Canon with eXTRASCAN Canon for a complete NEXTSTEP-based color publishing system. GS Corporation is committed to continually upgrade eXTRAPRINT to reflect advances in Canon's technologies. From input to output, you can count on GS Corporation for high-quality results.
